Section

This is our first section.

Another paragraph.

We can use Markdown for figures.

Markdown for lists

- One
- Two
    - Nested one
- Three
    1. Numerated list
    2. No need to specify number

We can even inline math: $y = ax + b$.
How about displayed equations:

$$y = -2.2x + 0.5$$

Subsection

Just use Markdown to define sections and structure of the document.

Let's finish with a footnote.[1]

---

[1] I'm a footnote!
